

HOW WE GROW YOUR BUSINESS

THE PURPOSE of Groval Euler's is to enable the ideas, energy, and actions that produce right efforts, thereby better results. The focus of my firm is to build revenue generation capabilities of an organization through better sales approaches, people management, leadership enablement, cross functional synergy, customer acquisition and account management. We do this through business performance consulting and sales and business coaching. We usually partner on long term business enablement projects. We also work with the cross functional teams to enable better alignment with business objectives of the company.

About me Before starting my own company, I have worked with Mercuri Goldmann, Mercuri Urval as a senior consultant and with Better Future (Nederlands based company) as their MD (APAC). I have conducted various international and Indian projects on sales capability development. Just to share, till now I have enabled over 8000 resources to enhance their sales and business performance capabilities.
